

SELECTION

We carry one of the largest precious metal inventories available in our industry and can process most stock items in 2 hours or less. Our drawing, slitting, rolling, and forming capabilities allow us to maintain the flexibility to meet any custom requirement.

- Fine wire* - Standard wire diameters: (.010" - .050" dia.)
- Ultra fine wire* (.001" - .010" dia.)
- Rod - Customer specific length and diameter (.050" - .375" dia.)
- Cut tubing
- Foil/Sheet (.0005" - .030" thickness, .010" - 6" width)
- Custom wire drawing and straightening
- Specialty wire forming, coiling and shaping
- Preforms by customer print

* NuTEC Medical can manufacture and ship custom wire sized down to .001" (+/- .0005) diameter.

STANDARD FORMS

Platinum

Pt 99.95% ASTM B 561
Pt / 10% Ir · Pt / 20% Ir
Pt / 10% Ni · Pt / 8% W

Gold / Silver

Au 99.99% ASTM B 562
Ag 99.99%

FULL SERVICE

NuTEC Medical is an exclusive precious metal supplier earning a worldwide reputation for innovation, quality, reliability and technical support. NuTEC is recognized as a premier supplier of high purity metals and alloys. We are an award winning, certified self release supplier to customers with the highest industry standards. With more than a combined century of experience in the high purity precious metals industry our expertise translates directly to complete customer satisfaction.

QUALITY

NuTEC Medical's "Attention to Detail" philosophy and our award winning customer support provides accurate and complete documentation including trace elements and actual chemistries. Our products are certified to AWS, AMS, Federal, Military and ASTM standards. Our company is also Certified and Registered to the ISO 9001 : 2000 and AS 9100B : 2004, and compliant to FDA standards.

TECHNOLOGY

We employ the latest technologies to keep all aspects of our manufacturing process lean and efficient. Our Kanban, Lean-Manufacturing and JIT delivery programs provide ultimate flexibility. Additionally, our engineering and quality department can help with any product development, material qualification, prototyping, or design assistance. This experience can also help in any cost reduction programs and strategies. We also support Kaizen Methodology, value stream mapping, supplier owned inventory, lean engineering, and master method programs.
